[praveenkanna](#) | [LinkedIn](#)

Summary

IT professional with **2 years of experience** in developing **web applications** using **Java, Spring Boot, and Microservices**. Proficient in **MySQL** for database management and skilled in building **user-friendly interfaces** with **Angular**. Strong **problem-solving abilities**, adaptability, and a results-driven approach enable me to contribute effectively to complex projects.

Technical Skills

Programming Languages: Core Java, JavaScript.

Frameworks: SpringBoot, Feign client, Reactive Stream, RestTemplate.

Web Development: Angular, HTML, CSS, Bootstrap.

Database: MySQL, Cassandra, Mongoddb.

Build & Dep: Jenkins, GitLab (VCS)

Additional

1. [GCP-Google Digital Leader \(Certified\)](#)
2. [Core Java by Hyperskill \(JetBrains Academy\)](#)
3. The Complete DSA (Udemy)
4. The Complete Design pattern(Udemy)

EXPERIENCE

Grid Dynamics India Pvt Ltd, Chennai, India

Feb 2023 – Jan 2025

Job Title: Associate Software Engineer

PROJECTS

Project (Currently Working): API Suite.

Client: Forever Living Products.

Project Description:

Developed a **comprehensive backend solution from scratch** that provides a **generic third-party API** for handling **order processing and enrollment** efficiently across multiple countries. The API ensures **seamless integration, scalability, and secure data exchange** between systems.

Responsibilities – currently maintaining:

- **Requirement Analysis:** Analyzed existing **order and enrollment APIs** to understand API flow and identify improvements.
- **Security Implementation:** Integrated **JWT authentication** for every request to ensure secure communication.
- **Feature Access Control:** Implemented **filter-based access control** and **Whitelisted Domain** for authorized domains.
- **Microservices Architecture:** Used **Eureka Server** for **service discovery** and **load balancing**.
- **End-to-End API Development:** Designed and implemented **order, enrollment, and business logic flow**.

Technologies Used:

- **Languages & Frameworks:** Java, Spring Boot, RestTemplate.
- **Frontend:** Angular TS & JS, Node JS.
- **Security:** JWT Authentication, Drools for business rule validation
- **Databases:** MySQL, Redis, Cassandra
- **Build Tools:** Maven

Project (Internal): Online Course Management System

Sep 2023- Dec 2023

Project Description:

Developed a **robust Online Course Management System** that allows users and professors to manage courses efficiently. The platform includes **secure authentication, course purchasing**, and an intuitive user experience with **account switching, advanced filtering**, and **role-based access control**.

Roles and Responsibilities:

- **User & Professor Authentication:** Implemented multi-step registration with **OTP verification (email/phone)**, **captcha enforcement**, and **profile customization** with image uploads.
- **Course Management & Enrollment:** Enabled professors to **create, manage, and publish courses**, while users can **browse, filter, and purchase** courses with a **shopping cart** feature.
- **Multi-Account Login & Profile Switching:** Allowed users to **log into two accounts simultaneously** and switch profiles seamlessly.
- **Secure Payment:** Integrated **Razorpay API** for **secure transactions**

Technologies

Backend: Java, Spring Boot, Microservice

Frontend: Angular, TypeScript, HTML, CSS

Tools: Docker, Visual Studio Code, Postman

Database: MySQL.
